

Integrated Control of Neglected Tropical Diseases

The Experience of Helen Keller International

International Society of Infectious Diseases – NTDs

Boston, MA

10 July 2011

Helen Keller International's Mission

To save the sight and lives of the most vulnerable and disadvantaged. We combat the causes and consequences of blindness and malnutrition by establishing programs based on evidence and research in vision, health and nutrition.

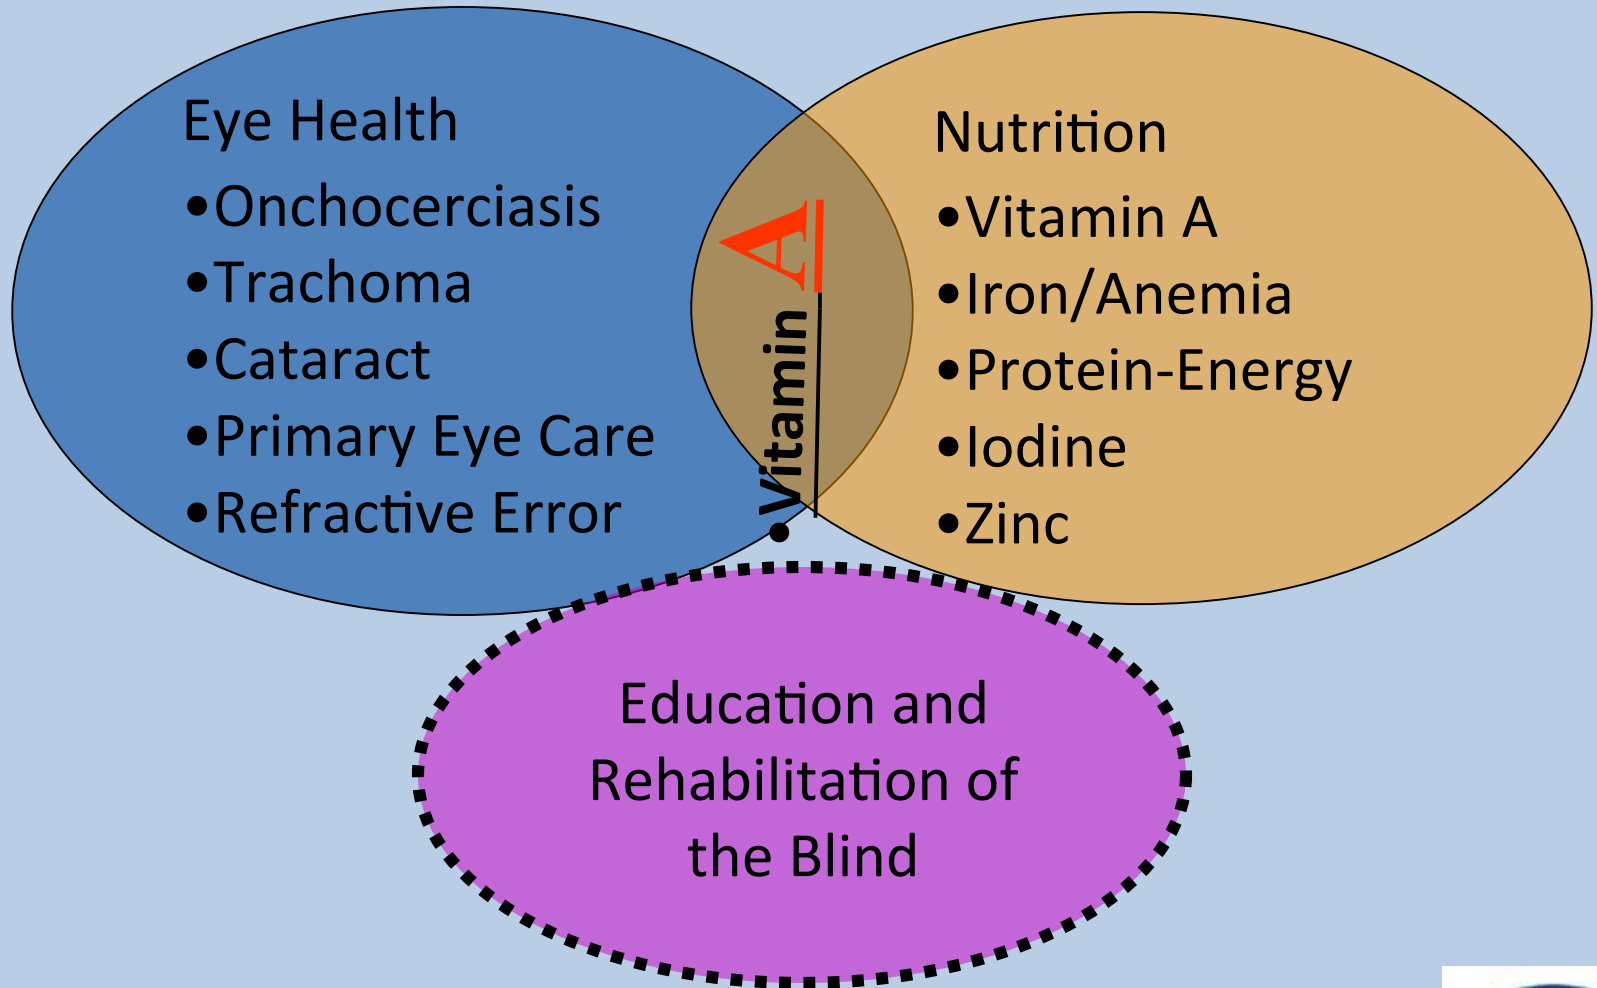

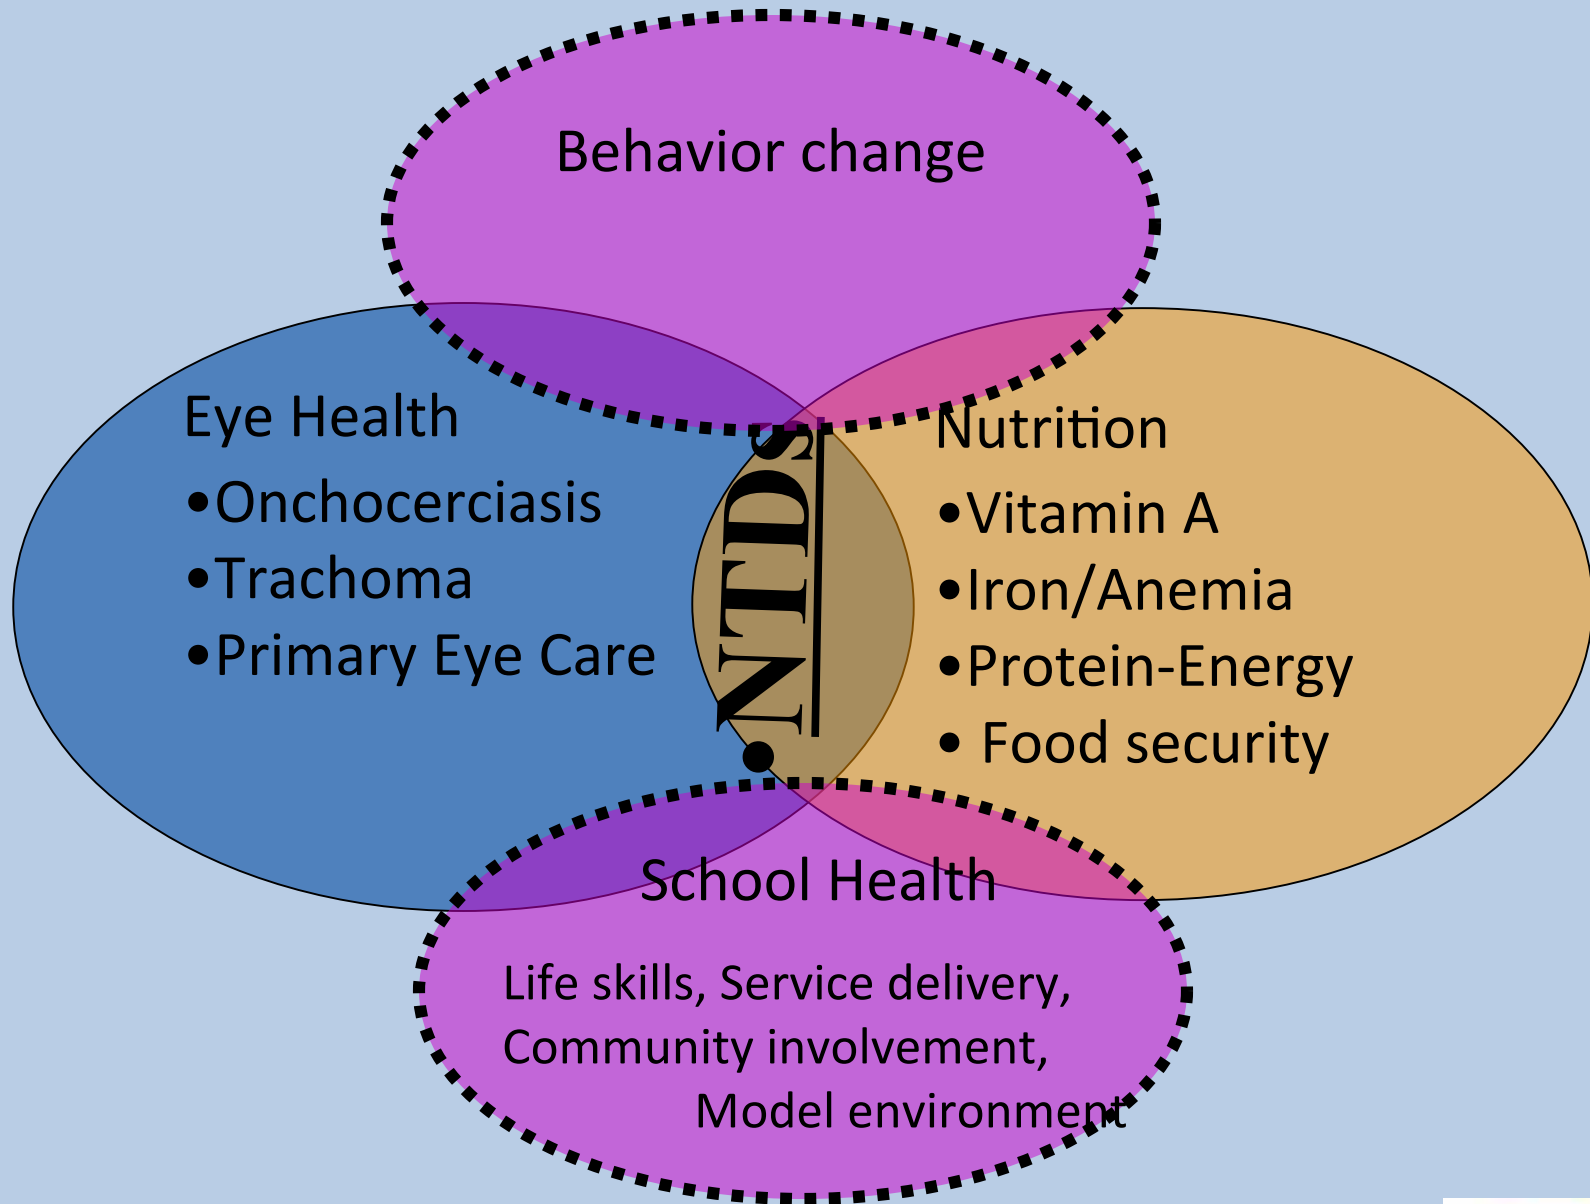

Role of Helen Keller International

- Support government policies and strategies
- Promote government ownership
- Provide technical assistance
- Develop and leverage partnerships
- Mobilize resources
- Develop strategies for scaling up

Traditional Program Areas – HKI

HKI and Neglected Tropical Diseases - History

1950's

- Programs to control and eliminate trachoma in Taiwan

1990's

- Programs for the control of onchocerciasis
- Integrated behavior change water-focused program to combat trachoma, schistosomiasis and diarrhea
- Integration of delivery of vitamin A and other activities into CDTI

HKI and Neglected Tropical Diseases - History

2000's

- Integration of lymphatic filariasis into CDTI
- School health programs for trachoma and STH including curriculum development
- Integration of de-worming into child health weeks for 12-59 month olds: Cote d'Ivoire, Cameroon, DRC, Mozambique, Senegal, Sierra Leone, Tanzania

Current Activities

Burkina Faso

- Integrated NTD Control
- Integrated school health (trachoma and vitamin A)
- Integrated oncho/LF/VA (delivery mechanisms and morbidity control)

Cameroon

- Integrated NTD Control
- Integration of deworming <5s into Child Health Weeks

Guinea

- Start up integrated NTD Control

Current Activities

Mali

- Integrated NTD Control
- Surgery and Face-washing for trachoma (radios)
- Integrated behavior change – trachoma and STH
- Integrated eye care (Koulikouro)

Mozambique

- Trachoma mapping
- Integration of deworming <5s into Child Health Weeks

Niger

- Integrated NTD Control
- Surgery and Face-washing for trachoma (radios)
- Trachoma school health

Current Activities

Sierra Leone

- Integrated NTD Control
- Integration of deworming <5s into Child Health Weeks

Tanzania

- Surgery and Face-washing for trachoma
- Trachoma school health
- Integration of deworming <5s into Child Health Weeks

Cambodia

- Development of primary school curriculum for STH

Nepal

- School health for F and E of SAFE strategy

Results

Mali - Geographic Scale-Up, 2007-2011

Cameroon - Geographic Scale-Up, 2008-2011

Cameroon - School-Based Deworming (Geographic Scale-Up), 2007-2011

Sierra Leone - Epidemiological Coverage, 2007-2010

Sierra Leone - Programmatic Coverage, 2008-2010

Sierra Leone - Deworming Mami e Pekin Wellbodi Week (Programmatic Coverage), 2006-2010

Challenges/ Future Directions

Ensuring Comprehensive Control

- Cannot rely solely on PCT
- Integrated strategies for diseases: SAFE, WASHED
- Public health problems require public health solutions: hygiene, sanitation, safe water, vector control
- Morbidity management, surgery
- Behavior change for sustained success

Challenges/ Future Directions

Integrated vs. vertical

- Emphasis needs to be on effective disease control

Government ownership

- Sustainability of community health workers

Cross-border issues

- Developing regional strategies

Expanding partnerships

Promoting nutritional recovery post-PCT

Gender

- Ensuring the equity of the work

With thanks to current funders:

- Canadian International Development Agency
- Children Without Worms/ Johnson&Johnson
- Conrad N. Hilton Foundation
- Government of Taiwan
- European Union
- Heart to Heart Foundation
- International Trachoma Initiative
 - Bouamatou Foundation
 - Bill and Melinda Gates Foundation
- Mectizan Donation Program
- Sabin Vaccine Institute/GNNTDC
- USAID
 - RTI International
 - FHI 360

I hope some animal never bores a hole in my head and lays its eggs in my brain, because later you might think you're having a good idea but it's just eggs hatching.

-Jack Handy
